Dog Jar Cover

HOW TO MAKE

Begin by making a magic ring and follow chart 1 to make the jar cover. You can adapt the pattern to other sizes by increasing the base as much as you need and changing to color 00107 once you have covered the 60% of the jar.

Make two ears, following chart 2. Leave a long tail when finishing the pieces. Use this tail to sew the ears to the top of the cover.

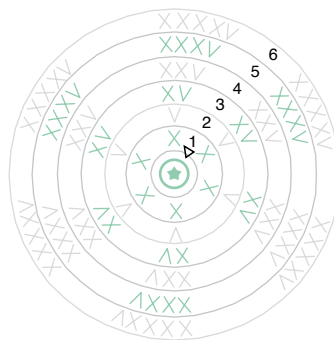

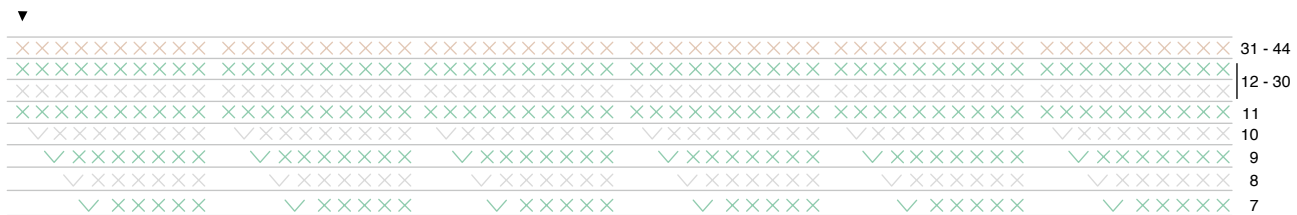

Make the nose following chart 3. Leave a long tail when finishing the piece. Place the security nose just in the middle and fill with a bit of toy stuff. Using the tail, sew the piece to the cover, centered between the ears.

Make the eye spot following chart 4. Leave a long tail when finishing the piece. Use this tail to sew it to the cover, close to the nose.

Make the bow following chart 5. Leave a long tail when finishing the piece. Fold the strip in half and sew the ends. Shape the bow using the same thread before sewing to the cover, just under the nose.

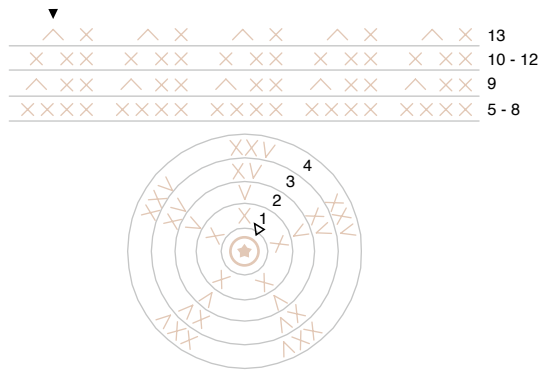

Finally, embroider the eyes using a bit of black thread.

WASHING ADVICE

Always wash in as warm a water temperature as possible - up to the temperature recommended, with a short spin. Use a lot of water if hand washing. For darker colours we recommend the use of discolouration sheets. Do not Bleach. Do not tumble dry. Drip-dry on a horizontal surface. Iron on a hot temperature setting using a damp cloth. Professional dry cleaning in tetrachloroethylene. Do not use optical brighteners (or any detergent containing optical brighteners). We recommend to use a softener to preserve the natural softness of the yarn.
